(a) Probability of being outdoors
Probability
Hour starting
Women, δA = −0.15
Men, δA = −0.15
Men, δA = −1.0
Children <5 y
(b) Relative mosquito biting
Share of nightly bites (%)
Hour starting
Reference Rout/in = 1.00
(c) Behavioural female–male difference
Change in F–M prevalence (pp)
δA (negative: men more often outdoors)
(d) Concentration of events
Smallest population fraction (%)
Clinical episodes
Attributed transmission
Overlap J+ = 0.64
